of your company's

# big picture

With every project, SysLogic applies **Technology with a Human Touch**. This is our commitment to understanding your complex business goals and finding innovative ways to extend the range, reach, and value of your investment in technology. Since 1995, SysLogic has supported clients like you in bringing your visions to life and transforming the way you do business.

We deliver both **big-picture strategic direction** and **detail-focused tactical execution** to align each client with relevant industry initiatives, proven best practices in architecture, design, and development, and the latest in technical innovation. We can supplement your team with a few strategic players or provide you with a complete team to design and build the right solution to meet your needs.

## The right team at the right time

SysLogic's commitment to continuous learning gives clients access to the innovative ideas of enterprise architects, developers, business analysts, and security specialists with some of the highest skill and knowledge levels within our industry. Our consultants have the technical aptitude and learning attitude to quickly bring themselves up to speed in order to help clients fill the gap when in-house resources with the required expertise are not available.

## Our core areas of expertise

SysLogic is a Microsoft Partner, and our developers are experienced in many different platforms. With every project, clients can tap into our team's expertise, which includes:

- IoT Software Enablement
- Azure Cloud Development
- .NET Application Development
- Embedded Systems Development
- Mobile Solution Development
- Enterprise Application Development & Integration
- Web Services / Service-Oriented Architecture
- Artificial Intelligence Solutions
- User Experience (UX) Design
- Responsive Web Development
